

Control Room Shifts:

A Year In Review - *Alan L. Stone*

Why Do Control Room Shifts?

- 1900+ Shift Positions to fill each Quarter
 - Distribute responsibility evenly among the collaboration
- Steady improvement of Data Quality
 - New energy & fresh perspectives
 - Improve online monitoring of data - **More eyeballs**
 - Understand detector performance & data taking
- Increase the pool of experts
 - Need to relieve/replace seasoned experts
- Grand equalizer within the Collaboration
 - 8 hour shifts - Punching a time clock like a **real** job!
 - Professors, Post-docs, Grad Students, even Spokes!

How Numbers Were Determined

- **DØ Shift Calendar**
 - 1 April 2001 - 31 March 2002
 - Quarterly Sums & Averages
- **CR Shifts Counted**
 - Shift Captain, DAQ Shifter
 - Detector Shifts: CAL, MUO, SMT, CFT, FPD
 - Software: SAM
 - 2 SAM Shifts = 1 CR Shift
 - Experts: DOC, LUM, L2, L3, CAL-Exp, SMT-Exp, CFT-Exp
 - 7 days On-Call = 1 CR Shift
- **No Double Counting**
 - Dual Shifts: CAP + Detector, DAQ + Detector
 - Gave 1 Shift Credit in the CAP or DAQ column
- **Most Recent Author & Masthead Lists**
 - Q2 2001: 23 MAR 2001
 - Q3 2001: 3 JUL 2001
 - Q4 2001: 7 SEP 2001
 - Q1 2002: 28 JAN 2002
- **Institutional Averages based on the Number on Inst. Masthead**
 - Assumed no exemptions
 - Presumed masthead was constant for quarter

Sums & Averages: Individuals & Institutions

- Top 10 Shifters:

- Andrew Askew *Rice* 64
- Ryan Hooper *Notre Dame* 54
- Horst Wahl *FSU* 52
- Greg Davis *Rochester* 49
- Marco Verzocchi *Maryland* 43
- Harald Fox *Northwestern* 42
- Joe Steele *Virginia* 43
- Mike Tuts *Columbia* 42
- Mingcheng Gao *Columbia* 41
- Alan Stone *LA Tech* 41

Sum = 471 Shifts = 8.7% Total!

- 5432 CR Shifts taken by 366 Shifters in past year
 - 14.84 Shifts/Person/year
- Average by Institution
 - 9.11 Shifts/Masthead/year
- Average by Consortium
 - 10.16 Shifts/Masthead/year
- More numbers by month & quarter, type of shift and DØ status - Some points to note:
 - 13 Institutions joined DØ only within the past year
 - Not all shift positions were filled throughout the year
 - Not all Shifters are on a Masthead
 - 17 Dual shifters - 131 "extra" shifts

Shifts Sums & Averages

Good News: Steady Increase

- More People on DØ Masthead
 - Increased by 10% in past year
- Increase of New Shifters Each Qtr
 - 150 → 174 → 218 → 273
 - 11 New People signed up for April & 8 more for May
 - Including new to DØ & members since Run 1
 - Still many openings for May & throughout the summer!
- Over 200 people took at least 10 shifts last year
 - 100 DØ colleagues were on shift at least 20 times!
 - Sixteen were non-residents!
- Great distribution of shifts in top 100
 - 15 Profs, 32 Scientists, 19 Post-docs & 34 Grad Students
 - 40 Different Institutions!

Quarterly Shifts

Q1 2002 Shifts

But...We Can Do Better!

- 1926 Shifts for Q1 2002 \Rightarrow 65% Increase!
 - Average of 1170/Q during 2001
 - First Quarter with fully staffed Control Room
- Qtr. Shift Burden: 6.4, 7.5, 5.7, 7.1
 - The increase of new shifters over the year has only met the need to fill new shift positions (CFT,SAM,Experts,etc.)
- Over 250 DØ Members have yet to take a Run 2 CR Shift
 - This explains the gap between Shifter & Inst. effort
 - 14.8 Shifts/Shifter/year \Leftrightarrow 9.3 Shifts/Inst Member/Year
- Extrapolating from Q1 2002:
 - We will need to fill about 7000 CR Shifts for next 12 months
 - Expect some cancelled shifts due to shutdown
 - May consolidate detectors shifts later in the year
 - 450+ Shifters required to maintain 15 Shifts/person/year

Apr 2001 - Mar 2002 Shift Average

Conclusions: Shift Scheduling

- Volunteer system is working well.
 - Requests made to IB for shifters
 - Information send to Shift organizers
 - Who is resident (R) or non-resident (NR)
 - Still some issues with filling owl & weekend detector shifts
 - Best time to be on shift - for beam!
 - ➔ No change to DAQ Shifters - need 35 Shifters/year
 - 6 Shifts/month, preferably for six months
- Training & documentation vastly improved
 - Average of 2 training shifts before going solo (3 for DAQ)
 - Shifter guides, meetings, web docs, user-friendly scripts & GUIs
- Make NR shift requests at least 2-3 months in advance
 - Best use of limited time (Class breaks, vacations, summer)
 - Possible to do many shifts in short period of time
 - Would require Shift Organizers to schedule 2-3 months in advance
 - DAQ & CAL already doing this

Still Need:
Aug – 2; Sep – 3
Oct – 4; Nov – 1
Dec – 1

Conclusions: Shift Distribution

- Uniform & increased counting of all Expert Shifts
 - On-call experts critical to detector/system performance
 - Called at all hours & spend extra hours online or in CR
 - Keep current with system to stay effective
 - The current accounting penalizes institutions when a person graduates from Shifter to Expert
- Modify Shift Formula to distribute 7000 Shifts among DØ Collaboration for next 12 months
 - Resident (R) to Non-Resident (NR) population is about 1/3 to 2/3 *(based on Sept 2001 numbers)*
 - With 3:1 ratio - 21(7) Shifts/R(NR)/year
 - With 2:1 ratio - 18(9) Shifts/R(NR)/year
 - Assumes 200 R & 400 NR

More efficient
use of manpower
& training

The Time to Volunteer for Summer Shifts Is Now!

25 April 2002
Institutional Board Mtg.
